

One of our goals at  
**Georgia Commute Schools**

is to make our region and our roads a safer place for young commuters in and around K-12 schools. One of the best ways you and your student can help is by choosing the school bus!

Students are 70 times more likely to safely get to school by bus than by car. However, students are most at risk when getting on and off the bus. Some ways your student can improve their school bus safety include:

Staying **10** feet away from all sides of the bus

**10'**

Standing on the sidewalk, even when getting on the bus

Putting away electronics when getting on or off the bus to avoid distractions

In the month of October, **Georgia Commute Schools** also celebrates **National School Bus Safety Week**. During this week, your student can look forward to fun activities that will educate them on ways they can protect themselves and others while on the bus!
