

Our goal is to help students, families and schools make a difference

by reducing traffic congestion and air pollution in our region. We're passionate about doing right by our community and the environment, and we know your organization is too. Partner with Georgia Commute Schools and spread the word about how we can all help clear the air and the roads around K-12 schools in Metro Atlanta.

The Georgia Commute Schools program can support community partners in several ways, including:

- **Recognize** community partners for their support to increase their visibility and credibility in the community.
- **Promote** community partners by featuring them on our website and in our social media, newsletters and other marketing materials.
- **Collaborate** with community partners to develop and implement transportation-related initiatives that benefit the community.
- **Offer incentives** to encourage participation in the program.
- **Provide information and resources**, including tip sheets, technical assistance, educational materials and other marketing materials to help partners promote the program and encourage participation.
- **Host events** with partners to showcase the benefits of sustainable transportation options and provide educational opportunities.
- **Offer volunteer opportunities** for partners to assist with events or serve as ambassadors

If your organization has an after-school program, Georgia Commute Schools welcomes the opportunity to participate and speak with students about air quality and the importance of choosing sustainable transportation options.
